

A powerful, yet simple solution to generating reports and interactive dashboards. Xtraction elevates your organization in gaining access to more data, promoting greater awareness, and increasing capabilities to make better business decisions.

Xtraction is a self-service solution offering simple drag-and-drop actions, selection lists, and point-and-click interactive controls to gain access to the data and information you need to elevate management capabilities of your business. This is the simple approach to the challenging problem of reporting on your data.

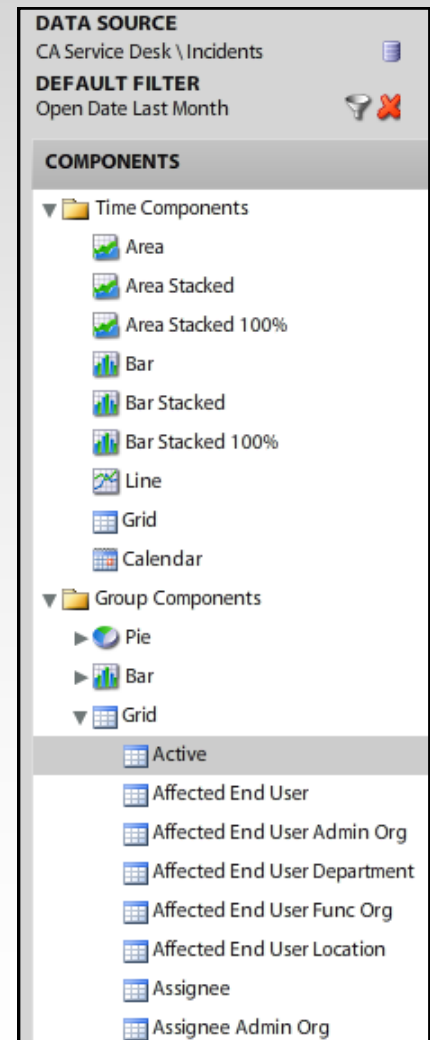

- ▶ Remove dependency on technical teams, coding, and cumbersome tools — Xtraction is easy to use and takes minutes to learn. Users across the organization are enabled and can be granted appropriate view or design access.
- ▶ Access all functions via the browser — removing the need for locally installed client software and maintenance.
- ▶ Connect multiple data sources — display your data sources into a single pane and extend management and reporting abilities.
- ▶ Secure access across data sources — control which of your users can access data within the connected data sources.
- ▶ Save time and money with immediate access to ad-hoc reporting and drill-down into interactive dashboards.

## There 's no simpler way to gain access to the data you need

You select the format in which to display your data, the fields you would like, and simply drag them into the dashboard placeholder. Xtraction does the rest. No coding. No complex commands.

- ▶ Out-of-the box adapters allow immediate access to data — install Xtraction and a data adapter and start using it immediately. We have done all the work for you, just start designing your dashboards.
- ▶ Pre-built layout selections — choose your various dashboard layouts from our extensive collection of graphical options.
- ▶ Wide selection of graphical display components — display data in charts, graphs, calendar, grids, and pivot table layout formats.
- ▶ Smart date range selections — This Week, Last Week, Last Month, Last Month, Last Year. Build dashboards with contextual date ranges, save them, and they always display the data within the date ranges you need.
- ▶ Display data from multiple data sources in a single dashboard — connect Xtraction to multiple data sources and present disparate data with the same dashboard.
- ▶ Interact with the dashboard — Xtraction dashboards offer interactive functionality, enabling you to drill-down into underlying records and cross-filter associated components in context with your interests, such as by particular dates, locations, persons, and/or objects. Simply click on the data series and select the filter options desired.

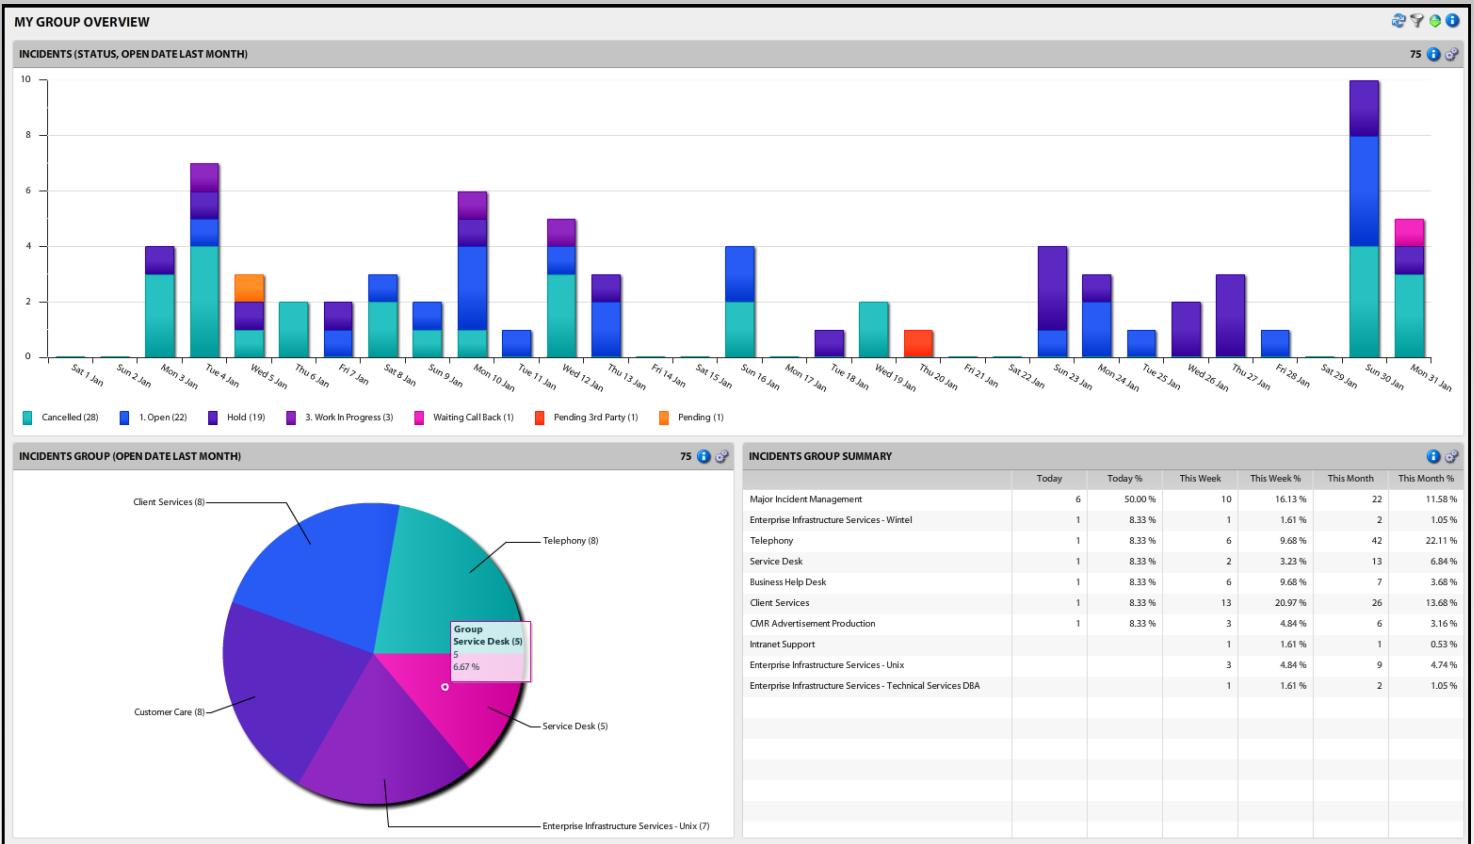

# Xtraction saves you time & money, and provides a simpler reporting solution.

Xtraction dashboards and reports are interactive, allowing more analysis and investigation to be performed than with traditional static reports. Xtraction also offers auto-refresh and the ability to scroll through multiple dashboards. Perfect for large screen displays where information needs to be shared with a group or audience.

## 100% customer satisfaction and retention rate! Features include:

- ▶ Elevates existing reporting
- ▶ Empowers new groups & users
- ▶ Increases business awareness
- ▶ Graphically rich interface
- ▶ Intuitive user-friendly design
- ▶ Role-based access data control
- ▶ Interactive real-time filtering
- ▶ Drill-down to underlying records
- ▶ Export to various formats

Built in security provides total data control – you can assign all levels of control and define policies with broad or fine-grain attributes, restricting access to data sources and data fields. You associate users with role-based groups to allow an easy method of sharing access quickly with distributed users.

- ▶ User profile management - users can easily manage their own time zones, record columns display, and font size.
